Professional Summary

Motivated Computer Science undergraduate (B.E., 2026) skilled in Java, Spring Boot, and PostgreSQL. Experienced in building RESTful APIs and implementing secure JWT-based authentication with Spring Security. Hands-on experience in developing scalable backend applications using JPA and layered architecture. Strong foundation in Data Structures & Algorithms, OOP, and Database Management Systems with proven problem-solving skills. Seeking an entry-level Software Engineer role to build efficient, reliable, and production-grade software in agile environments.

Education

Government College of Engineering, Tirunelveli

2022-2026

B.E. in Computer Science and Engineering

CGPA: 8.3/10

HSC - 96%

2022

Jawahar Matric Higher Secondary School, Chidambaram, Cuddalore

Skills

- **Languages:** Java.
- **Frameworks:** Spring Boot.
- **Databases:** MySQL, PostgreSQL.
- **Tools:** IntelliJ IDEA, Postman, VS Code.
- **Course Works:** Data Structures and Algorithms, OOP, DBMS, Agile Methodologies.

Projects

Staff-Class Management System (Microservices) — Java, Spring Boot, MySQL

- Designed and built RESTful APIs using Spring Boot, enabling seamless inter-service communication through Spring WebClient.
- Implemented end-to-end CRUD functionalities and integrated services to efficiently manage Staff-Class relationships with a scalable backend design.

Smart Blood Donation Management System - Spring Boot, Next.js, Spring Security, JWT, PostgreSQL

- Built a full-stack web application connecting donors, hospitals, and admins with role-based dashboards.
- Secured 15+ RESTful APIs using JWT authentication and role-based access control.
- Enabled real-time blood request tracking with efficient database operations.
- Crafted responsive frontend using Next.js with protected routing and API integration.

Employee Management System - Java, Spring Boot, Spring Security, JWT, PostgreSQL

- Engineered 10+ RESTful APIs for employee, department, and role management.
- Integrated JWT-based authentication and role-based authorization using Spring Security.
- Architected layered backend structure with PostgreSQL integration and global exception handling.

ToDo Backend API - Java, Spring Boot, PostgreSQL

- Designed and built 8+ RESTful APIs enabling CRUD operations using Spring Boot and PostgreSQL.
- Structured layered architecture with efficient query handling and management.

Experience

Spring Boot Intern - Icanio Technology, Tirunelveli

July 2025

- Contributed to scalable backend features and RESTful services using Spring Boot and PostgreSQL.
- Strengthened endpoint security through authentication and authorization mechanisms.
- Enhanced application performance through code refinement and participation in Agile reviews.

Certifications

- Java OOP – Udemy (ITER Academy)
